

CONTENTS

Gülen Başcanbaz-Tunca, Ayşegül Erençin, A. Feza Güvenilir and Radu Păltănea	
Approximation of fractional derivatives by Brass-Stancu operators ..	5
Igoris Belovas, Rugile Čepaitytė and Martynas Sabaliauskas	
On the zero-free region and the distribution of zeros of the prime zeta function	27
E-M. Craciun, S.K. Tiwari and S. Das	
Numerical solution of nonlinear reaction advection-diffusion equation using the modified collocation method	45
Zrinka Franušić and Ana Jursić	
Is there a polynomial $D(2X + 1)$ -quadruple?	67
Ariana Găină and Mihail Megan	
Necessary conditions and sufficient conditions for h-dichotomy of skew-evolution cocycles in Banach spaces	89
Evelia R. García Barroso, Marcelo E. Hernandez and M. Fernando Hernández Iglesias	
The topology of the generic polar curve and the Zariski invariant for branches of genus one	107
Răzvan-Cornel Sfetcu, Elena-Grațiela Robe-Voinea and Florentin Șerban	
An alternate measure of the cumulative residual Sharma-Taneja-Mittal entropy	125
Ivan Stanimirović	
Evaluating $A_{T,S}^{(2)}$ Matrix Inverses from full-rank Singular Value Decomposition	143
Ioan Vladimir Vîntu	
On some differential inclusions with anti-periodic solutions	157
A. Zare and B. Davvaz	
On topological quotient hyperrings and α^* -relation	179
