|                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Lamia S. Alqahtani, Siraj Uddin and Rawan Bossly</b><br>Pointwise hemi-slant warped product submanifolds in nearly<br>Kaehler manifolds .....                         | 5   |
| <b>R. Gurusamy, P. Vignesh, R. Rathajeyalakshmi and<br/>Raúl M. Falcón</b><br>Steiner distances in generalized corona products .....                                     | 21  |
| <b>Hani A. Khashan and Ece Yetkin Celikel</b><br>Square-difference factor absorbing submodules of modules over<br>commutative rings .....                                | 41  |
| <b>Dijana Mosić</b><br>Weak MPCEP and *CEPMP inverses .....                                                                                                              | 67  |
| <b>Tahsin Oner, Tugce Katican and Arsham Borumand Saeid</b><br>The characterization of Nelson algebras by Sheffer stroke .....                                           | 93  |
| <b>Iulia - Cătălina Pleşca, Marius Tărnăuceanu</b><br>Almost and quasi-Leinster groups .....                                                                             | 121 |
| <b>Cristina Sburlan</b><br>A mathematical note about a FLRW universe embedded in a<br>universe without time .....                                                        | 135 |
| <b>Shamsadini, H. Aghabozorgi, M. Jafarpour and<br/>S. Hoskova-Mayerova</b><br>Extension of Paul Erdős graph on hypergroups .....                                        | 145 |
| <b>Saurav Sharma</b><br>An examination of the fundamental solution and Green's<br>function in orthotropic photothermoelastic with diffusion<br>under the MGT model ..... | 165 |
| <b>Yaroslav Zabolotnyi and Iryna Denega</b><br>A note on conformal mappings onto mutually non-overlapping<br>domains .....                                               | 215 |
